

# TRACK CAMERA SYSTEM

*Mobile video surveillance solutions*

WG Security Products Inc. introduces its newest video platform, the Track Camera Rail System. Designed to monitor spacious floor areas, these track cameras can be automated or controlled by an operator. Compatible with analog formats, this digital rail system represents a high mark in video surveillance and protection for retail, warehouse and other large-area environments.

**The perfect video solution for home improvement, department, outlet and warehouse stores!**

- PTZ cameras on gliding carriage provide a 360° rotational capability to avoid blind spots
- Customizable to any length in increments of 4 meters
- Camera speeds of up to 6 meters per second
- Compatibility to completely integrate with traditional analog systems and protocols, while maintaining the advanced features of its digital technology
- Programmable to rotate while traveling for greater surveillance
- Programmable preset function for easier operator use
- IP camera-ready
- High level of reliability and robustness
- Fast and easy installation
- Light-weight and noiseless
- Low maintenance costs
