Remote Alarm for Smart Tags

Daily Alarm Log

Monthly Alarm Log

Yearly Alarm Log

Location, Time, Date and Dept Alarm Log

Once the tag has been attacked an audible visual remote alarm activates,
& turns the DVR on to start recording.

Remote Alarm:
Our Wi-Fi visual and audible alarm activates when the Bandit tag alarms from up to 100 feet away. Cloud based data storage is available at no additional charge via Wi-Fi access. This allows the LP or AP departments to conduct forensic investigations and track alarms with video by store location, department and time of day. The Bandit is available in 58kHz and 8.2 kHz frequencies and can be deactivated with a WG IR detacher.

EAS Alarm:
When tag is in armed status, any events causing tag to enter the EAS system's field will trigger the tag to self-alarm as well as the system will alarm.
