

The start of something new

3 Alarm Smart Tags

The **3 Alarm Smart Tag** is an advanced retail security device designed to provide enhanced protection for high-value merchandise. Unlike standard EAS tags, the 3 Alarm Smart Tag incorporates multiple alarm triggers to significantly reduce theft and unauthorized tag removal.

Key Features:

- **Triple Alarm Protection** – The tag activates an alarm under three different conditions: when passing through EAS detection systems, when the tag cable is cut or tampered with, and when forced removal is attempted.
- **Built-in Audible Alarm** – A high-decibel alarm immediately sounds when tampering is detected, drawing attention and deterring theft.
- **Compatible with EAS Systems** – Works seamlessly with standard RF or AM Electronic Article Surveillance systems used at store exits.
- **Durable Cable or Pin Design** – Secures tightly around merchandise such as handbags, shoes, apparel, and accessories.
- **Reusable & Long-Lasting** – Designed for repeated use with long battery life and durable housing.

Benefits to Retailers:

- Provides **maximum protection for high-value items**
- **Deters theft at the product level** before items reach store exits
- Reduces shrink while maintaining **open merchandising**
- Helps staff quickly identify tampering attempts

Applications:

The 3 Alarm Smart Tag is ideal for protecting items such as designer apparel, handbags, footwear, sporting goods, and other high-value merchandise that require enhanced security on the sales floor.
