Digital External Alarm

WG-EXA-G Alarm Console – Technical Specification Sheet

Application: Designed to provide an additional audible alarm for WG theft detection systems in areas where standard alarms may not be sufficient.

Product Description

The WG-EXA-G Alarm Console is an auxiliary alarm device designed to enhance the effectiveness of WG theft detection systems in environments with high background noise, such as loud music or busy retail areas. The console provides a clear audible alert when a system alarm is triggered. It also features selectable alarm tones and a unique voice recording capability for customized alarm messages. A built-in display with an alarm counter allows staff to easily monitor alarm activity.

Key Features

- Available in black or white
- Provides additional audible alarm coverage in remote or high-noise areas
- Multiple selectable alarm tones
- Voice recording capability for customized alarm messages
- Integrated display with alarm counter
- Compatible with WG theft detection systems
- Simple connection using standard CAT5 or CAT6 cable

Installation / Operation

The alarm console connects directly to the WG system controller or to the Smart Power Supply using a standard CAT5 or CAT6 cable. Once connected, the console provides audible and visual alerts when the system alarm is activated.

Technical Specifications

- **Model:** WG-EXA-G
- **Compatibility:** WG theft detection systems
- **Height:** 210 mm
- **Width:** 152 mm
- **Depth:** 30 mm
- **Power Requirement:** 10 VAC, 50/60 Hz

Typical Applications

- Retail stores with loud background music
- Large retail spaces requiring remote alarm notification
- Department stores and shopping centers
- Areas where additional audible alarm coverage is required
