

The start of something new

Hand-Held Remote IR Smart Detacher

Our advanced smart tags not only self-alarm when tampered with but also triggers the EAS detection system at store entrances. Any attempt to remove the tag with an unauthorized device or magnetic material will instantly trigger an alarm—ensuring uncompromising security. Whether a thief attempts to remove the anti-theft device or walks out with it still attached, WG Smart Tags ensures that security is immediately notified.

The IR Smart Detacher is an innovative, hand-held solution engineered for WG's patented four-alarm tagging system, delivering the highest level of product protection available on the market today. With WG's exclusive Smart Detacher Technology, the device emits a unique coded infrared (IR) signal that securely disarms the Smart Tag. Combined with its intelligent coded activation technology, powerful Super Lock magnet, tags can be removed quickly and efficiently in a single motion. For added protection,

Compact, portable, and easy to operate, the IR Smart Detacher not only works flawlessly with WG's Smart Tags but is also capable of detaching a wide range of standard hard tags, giving retailers flexibility and peace of mind across multiple product lines.

Key Benefits:

- Secure IR-coded technology prevents unauthorized detaching
- Fast, one-motion tag removal for improved efficiency
- Integrated Super Lock magnet for maximum versatility
- Compatible with both WG Smart Tags and other standard hard tags
- Portable, ergonomic design for ease of use
