

The start of something new

# Ninja Extreme

## IR Ninja Extreme Smart Tag

The IR Ninja Extreme Smart Tag is a high-performance retail security solution designed to protect premium and high-theft merchandise. Combining advanced infrared technology with a powerful built-in alarm, this tag provides strong deterrence against tampering and unauthorized removal while maintaining an open merchandising environment.

### Key Features

- Advanced IR Technology – Enables secure activation and deactivation using compatible infrared detachers, allowing controlled tag management by authorized staff.
- Integrated Audible Alarm – A high-decibel alarm sounds immediately if tampering, cable cutting, or forced removal is detected.
- Extreme Security Protection – Designed to provide enhanced resistance to tampering and unauthorized removal attempts.
- EAS System Compatibility – Works with standard RF or AM Electronic Article Surveillance systems at store exits for additional protection.
- Durable Reusable Design – Engineered for long-term retail use with rugged housing and extended battery life.
- Multiple Alarm Options – Available in both 4-Alarm and 3-Alarm configurations to support different retail security requirements.

### Applications

Ideal for protecting high-value merchandise such as luxury apparel, designer handbags, footwear, electronics, and sporting goods where maximum product-level security is required.
