

The start of something new

Eco Pinless Tag

Retail shrinkage is a universal challenge, but eco Pinless Tag is here to change the game. Our advanced security system not only self-alarms when tampered with but also triggers the EAS detection system at store entrances. Whether a thief attempts to remove the anti-theft device or walks out with it still attached, eco Pinless Tag ensures that security is immediately notified. While each retailer has their own protocol for handling theft, eco PinlessTag offers an extra layer of protection by helping you identify what's been stolen, especially high-value items.

Overview:

The eco Pinless Tag delivers advanced, multi-layered protection for high-value merchandise. Designed with a sleek, modern profile and premium materials, it combines maximum security with ease of use and retail-friendly aesthetics.

 - Ideal for apparel, accessories, and high-risk retail
 - Increased theft deterrence through multi-alarm redundancy

Comprehensive Security Features

eco Pinless Tag latest design offers all the standard anti-theft features, plus enhanced capabilities.

The Bubble

The Bubble is a strategic component of the eco Shoe Tag system. Resembling a dome camera, this device is placed in areas where eco Shoe Tags are protecting products. Equipped with a dual alarm system—flashing light and audible alarm, Bubble receives wireless signals from the eco Shoe Tag.

The smart Bubble can trigger a video recorder to take pre-programmed actions. For example, enlarging the display of a specific camera or issuing an alert to store personnel.
