

WiFi Sky Guard Loop

Invisible Is visibly better!

The Invisible Detection System is the ultimate for your store's interior design. It is the choice of many high-end apparel retailers, as the discreteness of the detection system doesn't interfere with the visual appearance of the entrance. The compact detection system is actually built into the door frame, eliminating the need for exposed hardware.

Sky Guard is a highly effective solution for the retailer needing theft protection but a fully invisible or very discrete system that doesn't interfere with the store architecture.

The system software can be optimized to your selection of ferrite hard tags or labels.

Jammer detection and **remote access** for quick support response are standard on all WiFi systems.

Ask us about our smart tag 4-Alarm technology for improved theft protection!

Transmitter can be hidden in the door frame with the controller out of view above the ceiling. The turbo antennas (digital receivers) are mounted in the door frame with low visibility or completely inside the frame.

Typical detection width is up to 10 feet with hard tags.

Controller

Operational Frequency: 58 kHz
 Input Voltage: 24vac

Physical Specifications (Controller & Power Supply)

WFCB Dimensions: 17.4"x12.6"x4" (44x32x8.64 mm)
 Weight: (TBD)

Adaptor Box

7.75"x7.5"x3.5" (19.7x19x9 cm)
 Weight: (TBD)

Turbo Antennas (x4)

9.5"x2"x1.5" (24x5x4 cm)

Power Supply

Input: 100-120/220-240vac
 50/60Hz
 Current: 0.5A max
 Output: 24vac
 Ambient temperature: 0 ° - 40 ° C
 Weight: 6.6 lb (3 kg)

Notes:

- Environmental conditions may affect overall detection performance.
- WG hard tags are recommended for optimum performance. Labels are not manufactured by WG and may at times underperform, resulting in decreased detection performance.
- Avoid false alarms by maintaining a 5-foot zone between the antennas and tagged articles.
