

EXA-G Digital External Alarm

Available in Black or White

External digital alarm console for all WG EAS Systems.

This alarm console provides an additional audible alarm in more remote areas or is used wherever the standard alarm is not sufficient because of loud background music or other sound around you.

WG-EXA-G offers a selection of different alarm tones,

The feature of a voice recording for individual messages in the event of an alarm is unique.

Display with alarm counter

Connection can be made from the system controller or the smart Power supply. A standard CAT5/ CAT 6 cable can be used for the connection.
