

Double Checker

Double Checker Tag Detection System

The **Double Checker Tag Detection System** is a smart retail solution designed to prevent security tags from leaving the store attached to purchased merchandise. By detecting active tags at the checkout, it alerts the cashier before the item is handed to the customer, helping eliminate missed tag removals and improving the overall customer experience.

Key Features

- **Tag Detection Reminder** – Identifies active security tags at checkout and alerts the cashier before completing the transaction.
- **Prevents Customer Inconvenience** – Reduces the risk of customers leaving the store with active tags, avoiding unnecessary returns or frustration.
- **Flexible Installation** – Can be **mounted under the countertop** or simply placed on top of the counter for easy integration.
- **Discreet Low-Profile Design** – Slim form factor allows for seamless use without interfering with checkout operations.
- **Easy Integration** – Works alongside existing EAS systems to enhance overall store efficiency.

Specifications

- **Dimensions:** 34 × 24 × 2.5 cm

Applications

Ideal for **retail checkout counters**, ensuring all security tags are properly removed before merchandise is handed to the customer, improving service quality and reducing operational errors.
