

The start of something new

IR 4 Alarm Lanyard Tag

IR 4 Alarm Lanyard Tag

The **IR 4 Alarm Lanyard Tag** is a high-security retail protection solution designed to safeguard high-value merchandise using a secure lanyard attachment. Featuring infrared technology and four independent alarm triggers, the tag delivers advanced product-level security while allowing merchandise to remain openly displayed on the sales floor.

Key Features

- **Four Alarm Protection** – Activates an alarm when passing through EAS detection systems, when the lanyard is cut or tampered with, when forced removal is attempted, or when the tag is separated from the merchandise.
- **Infrared (IR) Technology** – Allows secure activation and deactivation using compatible IR detachers, ensuring controlled tag management by authorized store personnel.
- **Integrated Audible Alarm** – A built-in high-decibel alarm immediately sounds if tampering or unauthorized removal is detected.
- **Secure Lanyard Attachment** – The durable lanyard loop provides a reliable way to protect items without penetrating or damaging the product.
- **EAS System Compatibility** – Works seamlessly with standard RF or AM Electronic Article Surveillance systems at store exits.
- **Durable Reusable Design** – Built for long-term retail use with rugged housing and extended battery life.

Applications

Ideal for protecting **high-value merchandise** such as handbags, luggage, footwear, sporting goods, and accessories where a non-invasive lanyard attachment is preferred for secure product-level protection.
