2 Alarm Pinless Tag

Comprehensive Security, Elevated Design

Overview

The 2-Alarm Pinless Tag delivers enhanced security through dual-layer protection while maintaining a sleek, pinless design. Engineered for high-traffic retail environments, it offers a balanced combination of strong theft deterrence, ease of use, and merchandise-friendly application.

General Operation

The tag is applied directly to merchandise in-store and activates an alarm under multiple unauthorized conditions, including forced removal or entry into an active EAS detection field (58 kHz or other supported frequencies) without proper deactivation.

Key Features

- **Dual-Alarm Protection (2-Alarm)**
  Two independent alarm triggers provide added protection against tampering and unauthorized removal.

- **Advanced Pinless Design**
  Eliminates the need for pins, reducing garment damage while ensuring a secure hold.

- **Modern, Low-Profile Construction**
  Manufactured with high-end materials to complement premium retail environments.

- **Adjustable Clip Mechanism**
  Securely accommodates varying material thicknesses for versatile use.

- **Plastic Clip**
  Maintains product visibility while delivering durability and strength.

- **EAS Compatibility**
  Optimized for 58 kHz systems and compatible with other supported frequencies.

Benefits

- Increased theft deterrence compared to single-alarm tags

- Faster application and removal for store associates

- Reduced merchandise damage and improved presentation

- Ideal for apparel, accessories, and higher-risk items
