3-Alarm Bandit Tag

Product Description

The 3-Alarm Bandit Tag is an advanced Electronic Article Surveillance (EAS) security tag engineered to deliver multiple layers of protection for retail merchandise. The tag combines standard EAS detection with an integrated audible alarm system designed to activate if the tag is tampered with or improperly removed. This multi-alarm design provides increased deterrence against theft and organized retail crime while maintaining ease of use at the point of sale.

Key Features

- Triple alarm protection for enhanced security

- Integrated audible alarm for tamper detection

- Strong magnetic Super Lock mechanism

- Durable impact-resistant construction

- Reusable and designed for long service life

- Compatible with standard retail detachers

- Suitable for protecting high-value merchandise

Installation / Operation

The Bandit Tag attaches to merchandise using a standard pin and locking mechanism. When the tag passes through an EAS detection system without proper removal, the system alarm will activate. In addition, the integrated alarm within the tag will sound if tampering or unauthorized removal is attempted. At checkout, the tag is removed using a compatible Super Lock magnetic detacher.

Technical Specifications

- **Alarm Type:** Triple alarm protection

- **Lock Type:** Super Lock magnetic mechanism

- **Tag Construction:** Durable ABS housing

- **Compatibility:** Standard EAS detection systems and Super Lock detachers

- **Reuse:** Reusable security tag

Typical Applications

- Apparel and fashion retail

- Electronics stores

- Luxury goods and accessories

- Department stores

- Retail environments requiring enhanced theft deterrence
