

The Start of Something New

Bottle Wrap Tag

Introducing our state-of-the-art Bottle Wrap Tag, featuring a 58KHz frequency and showcasing our patented IR 4 Alarm technology. Additionally, we offer a 3-alarm version for enhanced security.

Experience heightened security with WG's audible/visual remote alarm, triggered upon any attempt or attack on the smart tag. Leveraging WG's smart technology, this remote detects attacks on the tag up to an impressive 100 ft away. Take advantage of cloud-based data storage at no extra cost through Wi-Fi access. This enables Loss Prevention (LP) or Asset Protection (AP) departments to conduct thorough forensic investigations and track alarm activity using video data categorized by store, department, and time of day.

Stay ahead in security measures with our proprietary IR 4 Alarm technology, providing a reliable and advanced solution to safeguard your bottles. Enjoy versatile orientation as our tag comes equipped with swiveling capability, allowing seamless positioning horizontally or vertically on any bottle type. Our flexible strap, combining the robustness of steel with the flexibility of plastic, ensures a secure and adaptable fit without compromising on strength.

Designed for universal bottle compatibility, our tag accommodates various bottle shapes, from standard wine bottles to uniquely contoured tequila bottles, providing a versatile and secure solution.
